

NWEA/MAP Updates Fall 2019

- Students who have multiple rapid guesses will be automatically paused
 - A *rapid guess* means the student answered well below the average response time measured by NWEA for each test question. The response is so fast that the student could not have viewed the question completely.
- An alert will appear on the Proctor Screen
- Proctor will need to determine best next steps:
 - Enter pin on student computer and resume the test
 - Or, for multiple students, use controls on your console (click the alert box, select names, and click **Resume**)
 - Give student a break and resume at a later session
- After 3 “pauses” due to rapid guessing or 30% invalidation rate, the test will be stopped.
- Next Steps:
 - Teacher/Team decides whether to continue the student’s test another day, when the student is able to reengage. If so, then **Suspend** the test.
 - Before ending the testing session, click **Download Session Progress** to keep track of the student’s rapid guesses:
 - For excessive rapid guessing (30% or more rapid guessing), discuss with school team whether to start the test over (a retest).
 - When you continue testing or if you retest, click **Find Students to Test**, open the **Test History Search** tab, and use the applicable search filters:

Other Updates:

- Spanish math is available for grades K–12
- Spanish reading is available for grades K–8
- New Student Report—“Family Report”
