

## Clarifications on Progress Monitoring Schedules

Steps to take when out of grade level progress monitoring schedule ends (goal met, goal not met)

1. Create phase line **day after** last data point --Use “How to Review in AIMS” BPS RtI site.  
Chart Label: Goal Missed/Goal Met, New Schedule
2. Print and file in intervention folder.
3. Create a new schedule—Use “How To Create a Progress Monitoring Schedule” as a reference from BPS RtI site.

Goal Start Date: **Date of last data point**

Initial Corrects: Last data point.-- **If they missed goal** and will continue to be progress monitored at the same level. **If they met goal**, SLA at next grade level to determine initial corrects.

Initial Errors: Errors from last data point.

Initial Program Label: Intervention

Initial Program Description: Number of min, number of days per week, group size, interventionist

Goal Corrects/Points: EOY 40%tile at progress monitoring level.

4. Go back to schedule to determine “Goal Ending Date”.

**If out of grade level**, use ROI and Goal Template Sheet to determine number of weeks needed.

**If on grade level**, use end of year date.

Tip: If student is being progress monitored at grade level, use end of year date for goal ending date.

Example: May 16, 2014.
