

Student Fines, Fees, and Charges

The Bismarck Public School District will provide a free public school education to its resident students. The District, however, encourages student participation in and parental support of activities that enhance the educational experience beyond those items essential to the educational system. To support these enhanced activities, students may be required to contribute to the support of or furnish items for enhanced activities in a manner consistent with state law and administrative rules.

The District will seek to make funds available to provide activities for which a fee is authorized when parents and/or students are unable to pay the fees. Parents and students shall be notified of this waiver of fees policy. The District will not deny participation in a curricular program due to a student's or parent's inability to pay a fee authorized in this policy.
