

Requests to View North Dakota State Assessments

The Bismarck Public School District will comply with NDCC 15.1-21-14, which allows anyone over the age of 20 to view North Dakota State Assessments once these test are in the possession of the District. Other assessments administered by district schools are not available for viewing unless authorized by the assessment developer.

The Superintendent shall develop requirements for viewing North Dakota State Assessments. These requirements shall be consistent with guidance issued by the North Dakota Department of Public Instruction, shall include an age verification procedure, and shall prohibit any student who is required by law to take these assessments from previewing them. These requirements shall be printed on a request form. The request form must be completed by anyone wishing to view a North Dakota State Assessment. The request form shall be available in each school's main office. Information on the availability of the request form will be published in the district's newsletter.

Any suspected or known impropriety, irregularity, and/or breach associated with viewing a North Dakota State Assessment must be reported to a school administrator who shall report the issue to the assessment developer as soon as possible.
